

ASSTRA OIL & GAS FERTILIZER LOGISTICS

✉ oilgas@asstra.com
✉ sulphur@asstra.com

AsstrA Oil & Gas / Fertilizer Logistics organizes international and domestic logistics for oil & gas products and equipment. The company's experts provide cargo transportation via all types of transport and combined delivery schemes in Europe, the CIS, the Baltic States, South-East Asia, and Central Asia.

Transportation of refined products like lubricants, base oils, bitumen, additives, fuel oil, and carbon black in packages or in bulk;

Project logistics for production lines as well as oversized and heavy equipment;

Logistics for dry cargo like sulfur, urea, ammonium nitrate, and polymers;

ISO 9001
ISO 14001
ISO 22000
BUREAU VERITAS
Certification

ISO 9001, ISO 22000, and ISO 14001 certifications confirm AsstrA's readiness to fulfill orders at a high level, in accordance with international quality standards. AsstrA has voluntarily passed a check for compliance with the requirements for logistics providers that are engaged in the transportation of chemical goods, and received the SQAS certificate – a tool for quality control and safety of operational actions when working with both neutral and dangerous chemical products.
